

VOL. 1 ISSUE 1 • SUMMER 2023

LAKE ASSOCIATION OF WHITE LAKE, NY

The Association was formed in 2022 by residents in the White Lake and Kauneonga Lake community to become a single, organized voice to represent our community. With collaboration as our guide, we will use our voice to support the monitoring of water quality and other projects designed to maintain and improve the quality of the White Lake ecosystem. Please join us to help identify and fund projects that meet this goal.

Summer 2023 Initiatives

Start participating in the NY State water sampling program to monitor algae blooms, water clarity, and assess phosphorus, nitrogen and other water chemistry levels in the lake.

Participate in the USDA in NY State program to manage the goose population to healthy and sustainable levels.

Join the New York State Federation of Lake Associations.

Your Donation Makes an Impact
